DA0240/22

Wall Type Key (Plans)
11 August 2022

	Existing wall to remain
	Existing opening to be filled in and made good
	New masonry walls. External 230mm solid cavity masonry wall. Internal plaster finish (plus for paint prep). External finish per elevations.
	External stud wall - stud thickness as designed (R2.5 nail, stagger studs). Selects depending on elevations fixed to 20 - 55mm (set in to outside of vapour barrier or 15mm insulation board (Folboard or sm or R1.2). Plasterboard lining (unless noted otherwise).
	New internal stud wall - plasterboard lining both sides

Plan Notes:

- Site levels - refer to full survey
- All contractors to confirm location of critical services and seek approval with relevant authority before commencement of site works.
- FL refers to finished floor level
- CL refers to Ceiling structure only and does not include ceiling finishes. Contractors should confirm finishing levels prior to commencement of construction.
- Termite treatment to consist of chemical hand spray Part A and Part B per NCC and AS3660.

- All plans to be read in conjunction with Engineer's drawings.
- Masonry dimensions are to brickwork dimensions only and do not include any troweled or face adhered finishes. Framework dimensions are for structure only and not inclusive of cladding or linings.

- NB: All new plumbing fittings to comply with WELS star rating.
- Any new masonry structure to NCC requirements, Engineer's spec. and to AS3700. U.N.O all masonry walls finished internally with flush finish HWP. Refer to elevations for external finishes.
- All structural wall timbers treated timber (as per Eng's spec). All roofing timbers H2 (or to Eng's spec).
- All timber framed walls - studwork as dimensioned @ centres (cts) per AS1684 and Eng's spec. Refer to wall sections for general wall construction. Internal framed walls to include R2.5 bulk batt insulation between studs (not generally shown). U.N.O all stud walls internally lined with flush finish plasterboard.
- R4 insulation to new house ceilings. Anticon 55 to all new roof cover. Assumed existing house roof space is insulated.

- Tooth all brickwork where new masonry joins existing (ref. Eng's dwgs).
- Maintain continuous cavity - Cut external brickwork to maintain min 50mm continuous cavity from existing walls to new.

- Floors:
GRAND NOTE: 50mm set down to all new shower / wet areas - no hob to showers.

- New Wet Areas:** Existing laundry, bath to have new ceramic tile floor cover on existing concrete floor - by owner's agent. New Ens to have new ceramic tile floor cover to new concrete floor.

Ceilings

- As per sections. Ceiling lining generally flush finished (for paint prep) plasterboard.

- Alfresco ceiling - PVC jointed plasterboard.

Openings

- External openings**
U.N.O all new external doors and windows as per spec. All glazing to meet NCC requirements and AS1288.

Internal Doors

- U.N.O all new internal doors to be standard 2040mm height (th./cul. Door panels and hardware per specification).

DISCLAIMER:
Due to lack of survey marks/pegs, all building offset dimensions & features are approximate only and positioned from existing pegs/fences and walls which may not be on the correct alignment. Any design that involves additions to any structures shown or portion of structures remaining after any demolition has taken place requires boundaries to be re-surveyed and exact offsets provided to your designer/architect before any plans are produced and before any work is started on site.

DISCLAIMER:
Lot boundaries drawn on survey are based on landgate plan only. Survey does not include title search and as such may not show easements or other interests not shown on plan. Title should be checked to verify all lot details and for any easements or other interests which may affect building on the property.

DISCLAIMER:
Survey does not include verification of cadastral boundaries. All features and levels shown are based on orientation to existing pegs and fences only which may not be on correct cadastral alignment. Any designs based or dependent on the location of existing features should have those features' location verified in relation to the true boundary.

DISCLAIMER:
Survey shows visible features only and will not show locations of underground pipes or conduits for internal or mains services. Verification of the location of all internal and mains services should be confirmed prior to finalisation of any design work.

DISCLAIMER:
Cottage & Engineering surveys accept no responsibility for any physical or other changes to the land or portion of the land shown on the survey including any adjoining neighbours levels and features that have occurred after the date of this survey. All survey details plotted from information supplied by Water Corporation.

R'Code & Local Council policy - Satisfaction of the applicable "Deemed-to-comply" provisions
(Revision 1) & the objectives the applicable "Design Principles" DA0243/22

8 Jul 2022

Project Type: Demolition of existing single storey house & shed to make way for the future design on a one-off custom design of a high quality 2 storey residence.
Project Address: 31 Walker st. (lot 55) South Fremantle.
Client Name: Anna Gare & Lucien Longley
Applicable plans: aerial view & site plan

Too whom it may concern,

We wish design a new, energy efficient, high quality, one off, 2 storey house for 31 Walker st. South Fremantle.

The existing (approx 1970's built) house (with low ceilings, small rooms, asbestos eaves, clay roof tiles and asbestos fence) will need to be demolished to achieve this.

- We believe that the existing house is not heritage listed, has no significant positive heritage value ;
(& as it is not heritage listed the owners should have the right to demolish it if they wish.)
It does not contribute to the streetscape of this heritage area, in a significant way, for the following reasons:

Generally, the existing house:

- Does not contribute to the heritage character of the heritage area so should be allowed to be demolished.
- Has low quality scale and proportions and room sizes
- has asbestos eaves & in the rear section internally.
- Is a very low quality of volume built house for its era (was built around 1970's) & was the cheapest house that they could build at that time.
- And as it is not heritage listed the owners should have the right to demolish it if they wish.

Given that it is in a heritage area, we believe the heritage significance is none & its value to the streetscape and the South Fremantle heritage area are none ... in the following specific categories:

- Significance of the house - NONE (no discernible impact if demolished)
- description of place :
A Cheap 1970's volume builder house , brick and tiled roof with asbestos eaves, low ceilings and small rooms.
- heritage value – Aesthetic - NONE (no discernible impact if demolished)
- heritage value – historic - NONE (no discernible impact if demolished)
- heritage value – social - NONE (no discernible impact if demolished)
- heritage attributes – Aesthetic - NONE (no discernible impact if demolished)
- heritage attributes – rarity - NONE (no discernible impact if demolished)

Sam Martin Building Design
PO Box 1757 Fremantle WA 6959
T (08) 9336 3594
ABN 986 838 841 30
residential + commercial
www.sammartin.net.au

- heritage attributes – representativeness- NONE (no discernible impact if demolished)
- heritage attributes – integrity - NONE (no discernible impact if demolished)
- heritage attributes – authenticity - NONE (no discernible impact if demolished)
- Degree of change (positive and negative) on the place in light of its heritage significance.
 - NONE (no discernible negative impact if demolished)
 - (it will be Positive change to see an optimistic new, well designed energy efficient, fresh residence built)

- Degree of permanent impact (irreversible loss of value) that the proposal is likely to have on the heritage significance of the place - NONE (no discernible impact if demolished)

We have no historical information, aerial photos or information that dates the buildings/construction, we believe the building to have been built in approximately 1970.

Attached is an aerial view/ site plan of the existing house and some photos of it.

We also believe that demolition of the existing house should be allowed as:

- There is a significant & clear precedent set by several /many nearby properties being approved for demolition that are of a similar era and build quality....and in the same heritage area.
- We are intending on designing a great new energy efficient house that fits the materiality and Character, comes from and is part of the place and story of the South Fremantle Heritage area.
- The existing house does not contribute to the heritage character of the heritage area.

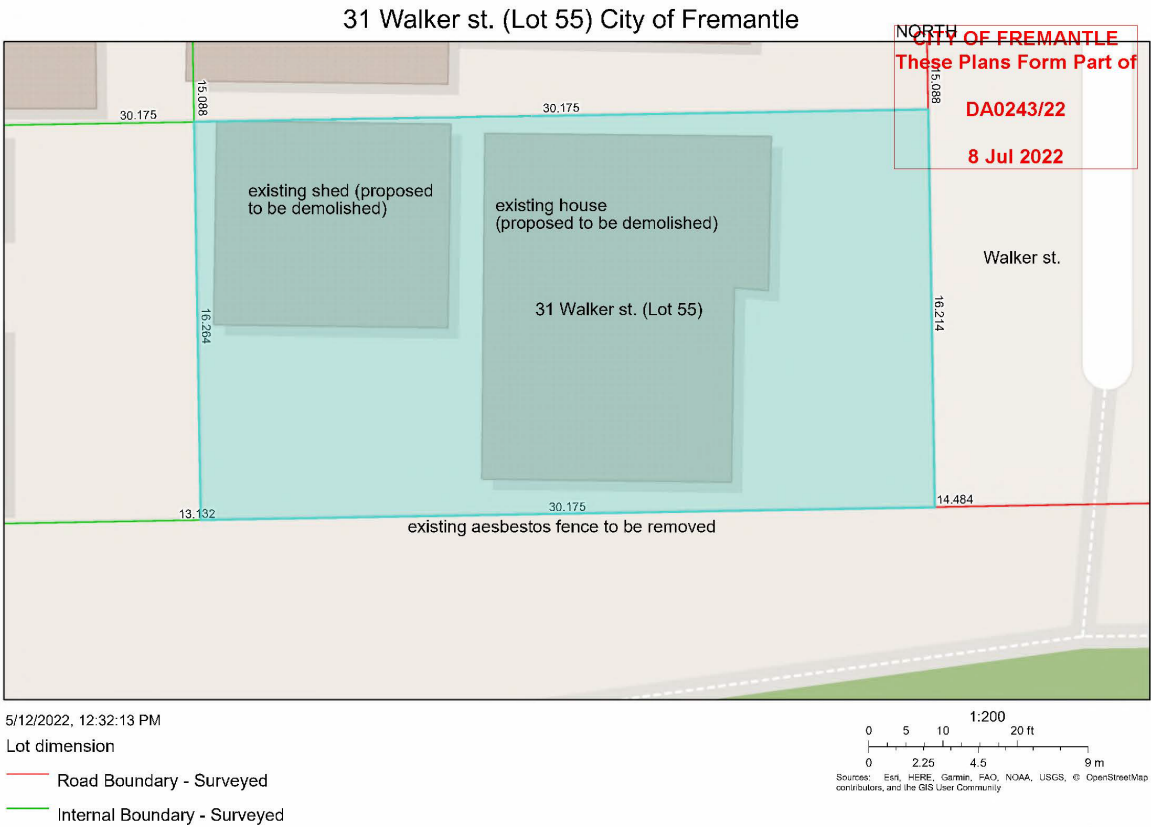

The Proposed 2 story residence (spirit, place, quality and character) we are proposing to design:

- The design of the proposed 2 storey residence is only at an early briefing and research stage.
- and will evolve as we continue the concept design & design development after demolition planning approval is granted.
- The proposed building will respond in a positive aesthetic way to the existing heritage area & streetscape in terms of setbacks, alignment, bulk, scale, height, sight lines, roof forms and opening shapes/forms.
- The proposed building & it's aesthetic will have a positive, not detrimental impact on the heritage values of Walker St.
- This proposed building will provide a positive, uplifting, and optimistic contribution to the heritage area & streetscape, adding to the story of it, evolving the historical built traditions & architecturally enhancing the quality of the street.
- The proposed residence, I believe, will be compatible with the context in terms of cultural heritage, form, bulk, scale, materials, and design. It wont adversely affect adjacent properties, and it would fit in very well, being a great addition to a wonderful street, streetscape & neighbourhood.

For any further information, or queries, please don't hesitate to contact me.

Thank you
& Kind regards,

Sam Martin. 0410 393 098.
